

My Mission

Healthy mind and body, that is to say, sound body and peace of mind
is our strongest desire.

Our work is to provide superior equipment, materials and various services
so that many people can live comfortably to the end of their lives.

However, unfortunately, there are people who injure their health
and must live with handicaps the rest of their lives.

We must do our best to develop products and services creatively so that
all human beings can optimize and show their "VITALITY".

By steady efforts, customers who really need Tokibo's products
and services will increase and only with their support Tokibo will flourish.

I firmly believe that heaven has called me to this work to help people
optimize and show their "VITALITY". I will be in the forefront
of others and will strive for this goal.

I hope that my work will result in healthy Tokibo and in bequeathing
wonderful earth to the future generation through all eternity.

Yasuhiko Sata

PRESIDENT, JANUARY 1981
